

The Sinclair broadcast group's mandate that their O&O's and other affiliate stations run a "documentary" clearly biased against anyone, in this case, Senator Kerry, does not serve the public interest and is an abuse of the public airwaves that they are privileged to use at no cost to them. I believe the FCC has a responsibility to review how Sinclair is serving the communities of the states in which they operate. I do not believe that this kind of documentary benefits the greater good.
